

**Musco Job Posting Notice
December 2020**

The Acrylic Surface Installer is responsible for taking ownership to ensure that Mini-Pitch surfacing projects are well planned and successfully executed on time.

Principal Duties and Responsibilities:

- Manage assigned projects and responsible for understanding all aspects of the surfacing process to meet customer specifications
- Work with internal and external teams to confirm that the job site is ready for surfacing and all necessary materials, equipment, and supplies are available
- Manage entire surfacing installation process: offloading materials, cleaning playing area, filling cracks, surfacing playing area, measuring court dimensions, and painting lines
- Actively record and report the progress of each project with the internal team and customers
- Work cohesively with internal engineers and on-site superintendents to ensure all project requirements and specifications are carried out successfully
- After surfacing, walkthrough with an onsite point of contact to ensure all critical list items are approved to existing specifications
- Collaborate effectively with the internal soccer development Team
- When time allows, support turf maintenance crews

Education & Experience Requirements:

- High school diploma or GED
- Knowledge and experience in acrylic application preferred, training also provided
- Must have valid driver's license

Job Specifications:

- Asphalt patching experience preferred
- Excellent technical and problem-solving ability
- Excellent verbal, written, and telephone communication skills
- Strong personal initiative and ability to work with little supervision
- Basic computer skills to communicate by email and manage expense reports

Other Special Requirements:

- Travel is required, primarily in the Midwest
- Long and odd work hours, including occasional weekends for travel or project work
- Able to meet physical requirements for the job; extensive time on feet, lifting supplies/products and various weather elements
